PESTICIDE SAFETY RULES

1. Read label carefully before using product.
2. Store chemicals under lock and key.
3. Keep chemicals in original containers.
4. Use chemicals only on crops specified and at correct rate and schedule.
5. Do not eat or smoke while applying pesticides.
6. Wear protective clothing and masks as directed.
7. Wash clothing and skin immediately if chemicals should come in contact with same.
8. Avoid chemical drift from one crop to another.
9. Keep a record of materials, amounts used and date of application.
10. Dispose of empty containers in such a way that they are no longer hazardous.
11. In case of accidental poisoning, call a physician or take patient to a hospital immediately.
12. See back cover for poison control center telephone numbers.

Minnesota and North Dakota”.

DO NOT USE THIS PUBLICATION AFTER DECEMBER 31, 2012
USE OF PESTICIDES

The pesticide recommendations in the Production Guide are based on the assumption that all pesticides mentioned will have a registered label with the U.S. Environmental Protection Agency. Pesticides should not be used which are no longer registered or have not yet received registration for sugarbeet. Sugarbeet treated with a pesticide not registered for sugarbeet may have an illegal residue which, if detected, could cause condemnation of the crop. Non-registered pesticide is **illegal** and a user could be subject to a heavy fine even without detectable residue.

All pesticide users should read and understand the pesticide label prior to pesticide use. Inclusion of all label details in the Production Guide is not possible and labels sometimes are modified after the annual Production Guide printing is completed.
